

Policy and Procedure Development and Management Policy

1. Introduction

Policy and procedure have critical roles in the operation of an organization. These documents are the link between an organization's strategic vision, mission, and mandate, and its governance and operational activities.

The Council may establish policies and procedures for the College of Acupuncturists of Alberta (the College) on any subject that affects the College. Also, the Executive Director/Registrar may define policy and procedure for all duties and responsibilities as designated by the Council.

College policies establish clear expectations and limits for actions and, along with the *Health Professions Act* (the Act), associated regulations, and the College bylaws, form the foundation for College decisions.

Policies and their associated procedures provide information to the Council, regulated members, College management, employees, and contractors regarding the College's philosophy, direction, or expected behaviors, and required actions.

2. Purpose

This policy has been established to provide a consistent, integrated, and managed approach for the initiation, development, approval, implementation, and review of all College policies and procedures.

The establishment of this policy and associated procedure helps ensure that policies and procedures are developed and managed in a consistent manner that considers and ensures:

- alignment with the Act, the Acupuncturists Profession Regulation, the College bylaws, and other College policies and procedures;
- compliance with legislation;
- engagement of appropriate subject matter experts to provide content;
- diligence in conducting research to understand and apply best practices where appropriate;
- consultation with appropriate stakeholders to facilitate acceptance and ensure that all appropriate matters are heard and considered; and
- consistency in presentation to help readers understand document contents.
