

Continuing Competence Program Rules

1. Introduction

The College of Acupuncturists of Alberta (College) is required to establish a Continuing Competence Program (CCP) under the *Health Professions Act*. The CCP provides regulated members an opportunity to maintain competence and to enhance the provision of professional services. The CCP monitors regulated members through continuing professional development and ensures the knowledge, skills, attitudes, and judgement required to provide professional services are maintained. By requiring regulated members to comply with the CCP and maintain competence throughout their career, it supports the College's mandate to protect public interest.
